

## Data Sheet for Recording Biometric Data:

Name:

E-Mail Address for any questions:

\_\_\_\_\_

Total Height \_\_\_\_\_ cm

Take your shoes off and stand with your back against a wall. Please ask someone to help you. Put a level (or a book also works well) on your head, and place the level against the wall. We need the exact distance between the bottom of the level and the floor.

Shoulder Width \_\_\_\_\_ cm

Stand with your back against a wall. Bitten Please ask someone to help you. Hold a book or level under each armpit. We need the distance between the inside edges of each book or level.

Shoulder Height \_\_\_\_\_ cm

Stand with your back against a wall. Please ask someone to help you. Measure the vertical distance between the floor and the place where your arm enters your shoulder.

Arm Length \_\_\_\_\_ cm

Stand with your back against a wall. Bitten Please ask someone to help you. Let your right arm hang straight down and make a fist with your hand. Measure the distance between the floor and the center of your fist.

Height of Hips \_\_\_\_\_ cm

Stand with your back against a wall. Locate your hip bone (on either side) and trace the bone with your hand to its highest point. That is the iliac crest. Please ask someone to help you. Measure the distance between the iliac crest, the top of the hip, to the floor.

Sitting Position

How you intend to sit on your new bike.

Comfortable

The height between the seat and the handlebars is 0cm.

Moderate

A small height difference (around 3-5cm) between the seat and handlebars.

Sport

Bigger difference between the seat and handlebars (ca. 6-10cm).

Please bring your pedals with you when you rent your bike, so we can mount them immediately.

Also please be aware of the conditions of our lease agreement.
